

Request A Quote!

STEP 1

Call our office at **630.761.3168** to request a free quote to inspect and certify your...

- Fire sprinkler system
- Fire pump
- Backflow devices
- Fire alarm systems
- Fire extinguishers

STEP 2

A member of our highly trained sales staff will visit your facility to provide you with an accurate quote. After you review, sign and fax the quote to **630.293.4338**, our Scheduling department will call you to schedule a convenient date and time for your inspection.

STEP 3

Once all inspections are completed, we will provide copies of all inspection reports and certifications to your office, local fire department and water department as required by law.

Serving the Greater Chicagoland Area

Our Company

Valley Fire Protection Services performs in-depth, thorough inspections of fire sprinkler systems and fire pumps for commercial, industrial and residential properties. Periodic inspections by a qualified contractor are required by the NFPA, local fire departments and insurance carriers in order to ensure that fire protection systems provide adequate life and property protection.

Illinois EPA regulations also require that every building's backflow prevention assembly be inspected and certified annually. Our licensed inspectors perform this service and provide the proper certificate to governmental agencies and insurance carriers.

We typically inspect our clients' systems in a single day each year in order to minimize disruption to their operations. They appreciate our "one call does it all" scheduling efficiency and the extraordinarily high level of service provider accountability that we provide. Client testimonials are available at www.valleyfireinspections.com.

Inspections

FIRE PUMPS

We certify & test:

- Fire pumps at 100% & 150%

- Wet & dry standpipes
- Main drains
- Water flow switches & control valves
- Fire department connections
- Supervisory, local & electric alarms
- Sprinkler heads

BACKFLOW DEVICES

We certify & test:

- Cross-connection controls
- All backflow assemblies & RPZs

101 N. Raddant Road • Batavia, Illinois 60510

Legislation

National Fire Protection Association (NFPA-25_Chapters_4&5)

"By means of periodic inspections, tests, and maintenance, the equipment shall show to be in good operating condition or any defects or impairments shall be revealed. These tasks shall be performed by personnel who have developed competence through training and experience."

** As of January 1, 2009, NFPA-25 requires all water-based fire inspections to be performed by a NICET Level 2 certified inspector.*

Illinois Environmental Protection Agency (IL-EPA_Title_35.F.2.H.E.1)

"Each device shall be tested at least annually or more frequently if recommended by the manufacturer.

Records submitted to the community public water supply shall be available for inspection by Agency personnel in accordance with IL Rev. Stat. 1983, ch. 111 ½, par. 1004(e).
